### **DETAILED ACTION**

## Status of Claims

In the response filed on April 4, 2005 with respect to the rejection of claims 1-16, applicant has canceled claims 8-15. Examiner's rejection with respect to claims 8-15 is otherwise moot. Thus, claims 1-7 and 16 remain pending.

## Response to Arguments

Applicant's arguments filed April 4, 2005 have been fully considered but they are not persuasive.

As per claim 1, applicant asserts that the cited reference (Christiano, 5,671,412) does not disclose the use of media disk identifiers, including a code associated with a vendor (response page 4). Applicant further contends that Christiano is "plainly a host based" digital rights management system (response p. 4).

As to the breadth, scope and application of Christiano's DRM system, the applicant is directed to column 26, lines 45-65. Christiano indicates that a license database is initialized wherein package descriptions and license items are read from an external file, external database or other storage medium (media disk, i.e., CD), which stores license data and package license descriptions for the license (column 10, lines 7-24). Christiano further describes identifiers and keys to store, verify and authenticate various data such as parameters of use, user name, host name, terminal name/location, vendor name, serial number, node/location address etc. (column 6, lines 60-67; column 8, lines 57-67; column 9, lines 35-39; column 23, line 40-column 24, line 29). In addition, Christiano discloses a "finder" process wherein the location of the license server can be determined as described and illustrated in columns 23-24 and figures 10-12.

Applicant further contends that claims 4-7 are not anticipated by the cited reference since they include a further limitation, namely, a "software installation component operable to install

an identifier on a media disk (response page 4)."

Christiano discloses that key/identifiers as previously described can be synthesized at the

time of the license record creation and stored in an external file (column 15-16).

As per applicant's argument regarding claim 16, applicant is directed to claims 31-41 of

Christiano and applicant's disclosure with reference to signal bearing media.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by

Christiano, U.S. Patent 5,671,412.

As per the following claims, Christiano discloses:

1. A method of identifying a location associated with a vendor of a media disk holding content,

the method comprising:

• providing instructions for the media disk (column 4, lines 35-57; column 10, lines 7-24);

• during an install of the media disk into a host according to the instructions, installing an

identifier on the media disk, the identifier including a code associated with the vendor

(figure 2a and associated text, column 8, lines 5-56; column 6, lines 60-67; column 8,

Art Unit: 3621

lines 57-67; column 9, lines 35-39; column 23, line 40-column 24, line 29; figures 10-13 and associated text); and

- after transmitting data to a server, reading the identifier to find a location associated with the vendor, the location being associated with the vendor of the media disk and independent of any vendors that are not associated with the media disk (columns 23-24; figure 10-12 and associated text).
- 2. The method of claim 1 wherein the instructions for the media disk include identifying a vendor from whom the media disk was purchased (figure 7 and associated text; column 15, line 45-column 16, line 39).
- 3. The method of claim 1 wherein the identifying the vendor from whom the media disk was purchased includes providing in the instructions one of a code, a universal resource locator (URL), a cryptographic key associated with the vendor, and a part of a cryptographic key associated with the vendor (figures 13-15 and associated text).
- 4. A system for identifying a location associated with a vendor of a media disk holding content, the system comprising: instructions for the media disk; and a software installation component associated with the media disk, the software installation component installation during an install of the media disk into a host according to the instructions, the software installation component operable to install an identifier on the media disk, the identifier including a code associated with the vendor, the identifier associated with a location of the vendor to such that a connection

Art Unit: 3621

between the host and a server is operable to open the location (column 23, line 24 – column 26, line 60).

- 5. The system of claim 4 wherein the instructions for the media disk include identifying a vendor from whom the media disk was purchased (figure 7 and associated text; column 15, line 45-column 16, line 39).
- 6. The system of claim 4 wherein the identifying the vendor from whom the media disk was purchased includes providing in the instructions one of a code, a universal resource locator (URL), a cryptographic key associated with the vendor, and a part of a cryptographic key associated with the vendor (figures 13-15 and associated text)
- 7. The system of claim 4 wherein the location is an Internet location including web pages for unlocking content stored on the media disk, the Internet location further providing optional offers for purchase over the Internet by the vendor (column 23, line 25 column 26, line 10).
- 16. A computer program product, the computer program product comprising: signal bearing media having programming adapted to: instantiate during an install of the signal bearing media into a host according to instructions; and install an identifier on the signal bearing media, the identifier including a code associated with a vendor of hidden content on the signal bearing media, the identifier associated with a location of the vendor to such that a connection between

Art Unit: 3621

the host and a server is operable to open the location (rejected as above; see claims 31-41 in Christiano).

Examiner has pointed out particular references contained in the prior arts of record in the body of this action for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the response, to consider fully the entire references as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior arts or disclosed by the examiner.

### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Application/Control Number: 09/940,025
